LEGAL DICTIONARIES
IN THE EUROPEAN UNION**

A critical bibliography

[Abstract]

Legal dictionaries are useful tools in preparing quality translations. Unfortunately, their quality is often questionable due to a lack of reliability. Many such dictionaries deserve serious criticism, which becomes clear when our evaluation criteria are applied. Based on comparative legal research, these criteria are applied to the basic organisation of bilingual and multilingual legal dictionaries.

The crucial issue in dictionary assessment is to establish a sound basis for criticism. We are convinced that this basis is found in the nature of the language of the law. The language of the law is very much a system-bound language, i.e. a language related to a specific legal system. Translators of legal terminology are obliged therefore to practice comparative law. Based on these crucial considerations, *desiderata* for reliable legal dictionaries may be formulated. A legal dictionary should indicate, for example, the degree of equivalence, or the absence thereof, in the target language-related legal system.

From this broad perspective we have developed a typology for the purpose of classifying hundreds of recently published legal dictionaries containing the legal languages of all EU Member States. We have established the following three categories; each successive category shows a higher degree of quality:

1) Word lists (WORD)

Those bilingual or multilingual lists of terms offering unsubstantiated translations; equivalence is assumed; no explanation as to different meanings is offered. Solely useful for words not found in other dictionaries;

2) Explanatory Dictionaries (EXPL)

Those also containing sample sentences illustrating the relevant linguistic context;

3) Comparative Dictionaries (COMP)

These also refer to legal systems and/or legal sources, such as legislation or the literature, and to legal areas or comparative law. They distinguish between legal systems that share the same language.

Our final conclusion is that most legal dictionaries must be classified as a word list, which implies here that they are of dubious quality. To date, few legal dictionaries have attempted to meet our criteria. Dictionaries that are based on comparative legal research, on the other hand, offer advantages that render them useful to professional translators.

The idea of a trichotomy can already be found with Jacques Le Tellier, who has distinguished three 'generations' of dictionaries: the first one does not give explanations nor examples; the second 'generation' provides for contexts to find equivalents; the third one offers contexts and definitions. (Jacques Le Tellier in a letter to the Asser Institute; see G. Hesseling, Een juridisch woordenboek: geen alledaags project; in: Tien jaren T.M.C. Asser Instituut 1965-1975, Den Haag 1975 (p. 141-148) p. 144.)

The names of the Member States of the European Union are abbreviated according to the most recent edition of the Interinstitutional style guide < 7.1.1. Designations and abbreviations to use <http://publications.eu.int/code/en/en-370101.htm> Last updated: 4.6.2004.

In connection to the names of the Member States, the direction of the translation is shown as follows:

→ one-way dictionary, only translating from e.g. FR into ES;

↔ bi-directional dictionary, for translating from e.g. FR into ES, and vice versa.

Anglo-Scandinavian Law Dictionary of Legal Terms Used in Professional and Commercial Practice

ISBN 8200023656

Contains a relatively low number of entries, but gives for these terms rather elaborated information. Contains references to literature and introductory information on the judicial organisation in England, Norway, Sweden and Denmark. The title of the dictionary is too broad, because it is obviously restricted to contract law. Interesting is that it is indicated explicitly whether for a given term from the source language a full or partial equivalent exists in the target language. If one can hesitate about the equivalence, this is indicated with 'compare'. Lack of an equivalent in the target language is also expressly mentioned.

Contains positive reviews of volume 1: p. 33-40. This volume is certainly less elaborated than the first volume. Contains an extensive bibliography. The information in the introductory part is, however, of limited importance and does not provide for a systematic introduction in the Italian legal system or the common law.

The dictionary is divided systematically with the terms being given a central place. The book contains gradations of equivalence and references to statutory provisions. 'Ein Musterbeispiel für ein gelungenes Zusammenspiel von Rechtsvergleichung und Terminologievergleich', according to R. Arntz (Rechtsvergleichung und Kontrastive Terminologiearbeit, in: P. Sandrini, Übersetzen von Rechtstexten, Tübingen 1999 (p. 185-201) p. 188).

'Regretfully, the dictionaries cover only a small number of terms (...). On the other hand, the methods of conceptual analysis used therein can serve as a model for others'; cf. S. Šarčević, New Approach to Legal Translation, The Hague 1997, p. 237.

Translations, e.g. 'tribunale', have been partially inversed. This is a bad word list.

According to G. Rouhette (Revue internationale de droit comparé 1991, p. 958) 'très éloigné du 'Dizionario giuridico' (...) de F. de Franchis'.

In the Italian/English part, incidentally references to legislative provisions have been made at the end of each list of entrance terms, each list being alphabetically ordered (starting with particular characters). This precludes an easy access to this information.
