

Now, THIS is really fascinating. It's rather dazzling to see it presented this way.

Earth

Venus

Mars

Mercury

Pluto

Jupiter

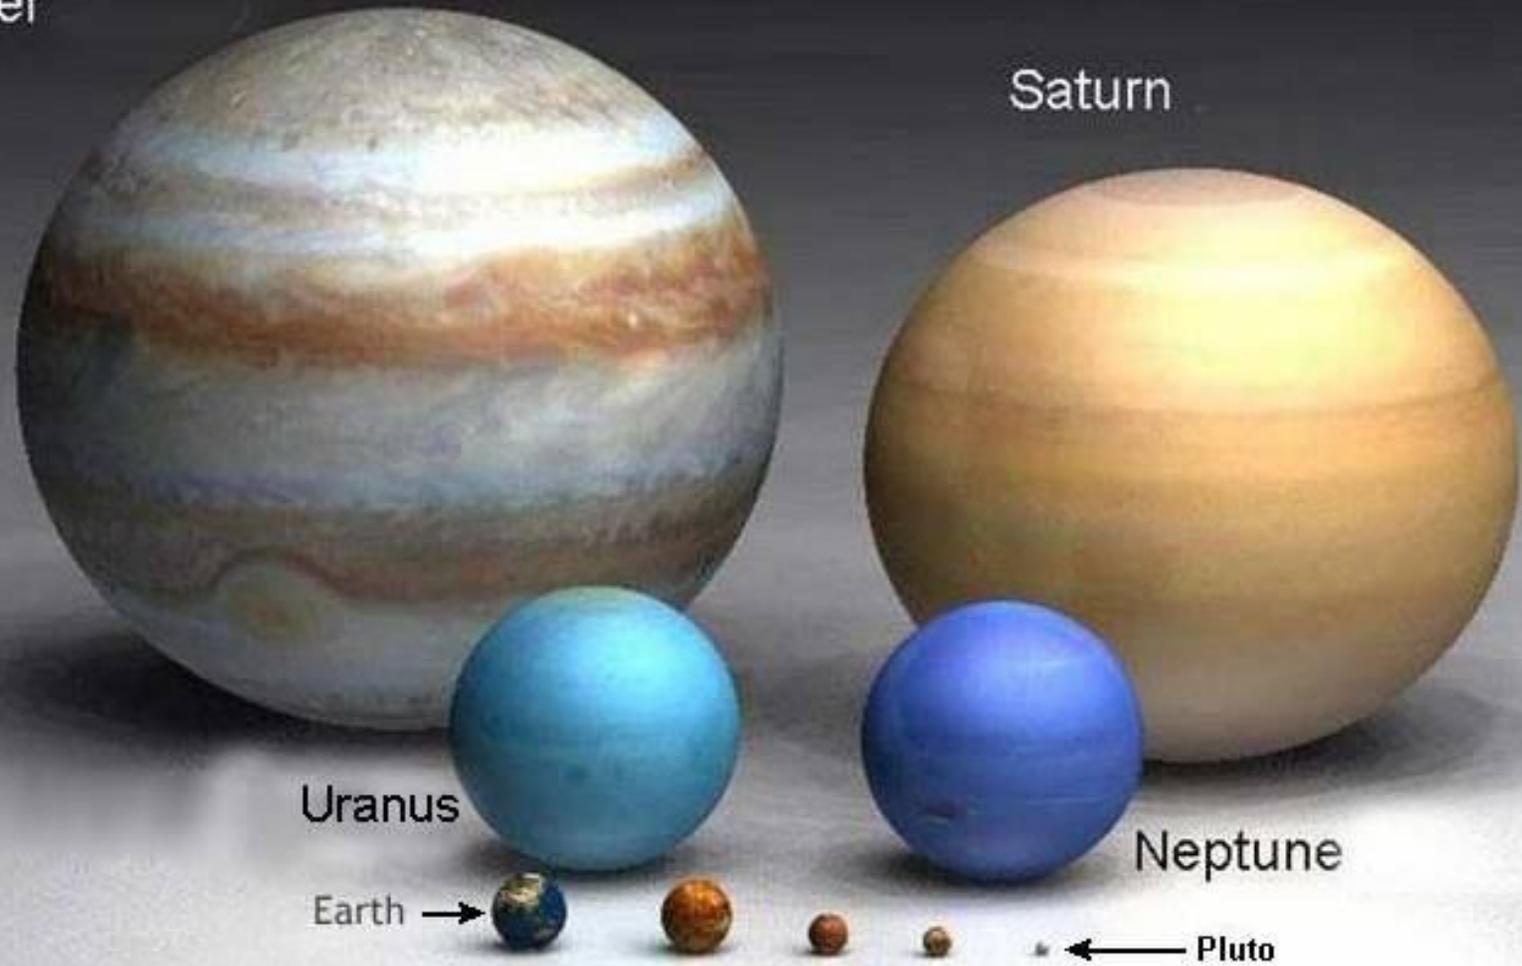

Saturn

Uranus

Neptune

Earth

Pluto

Sun

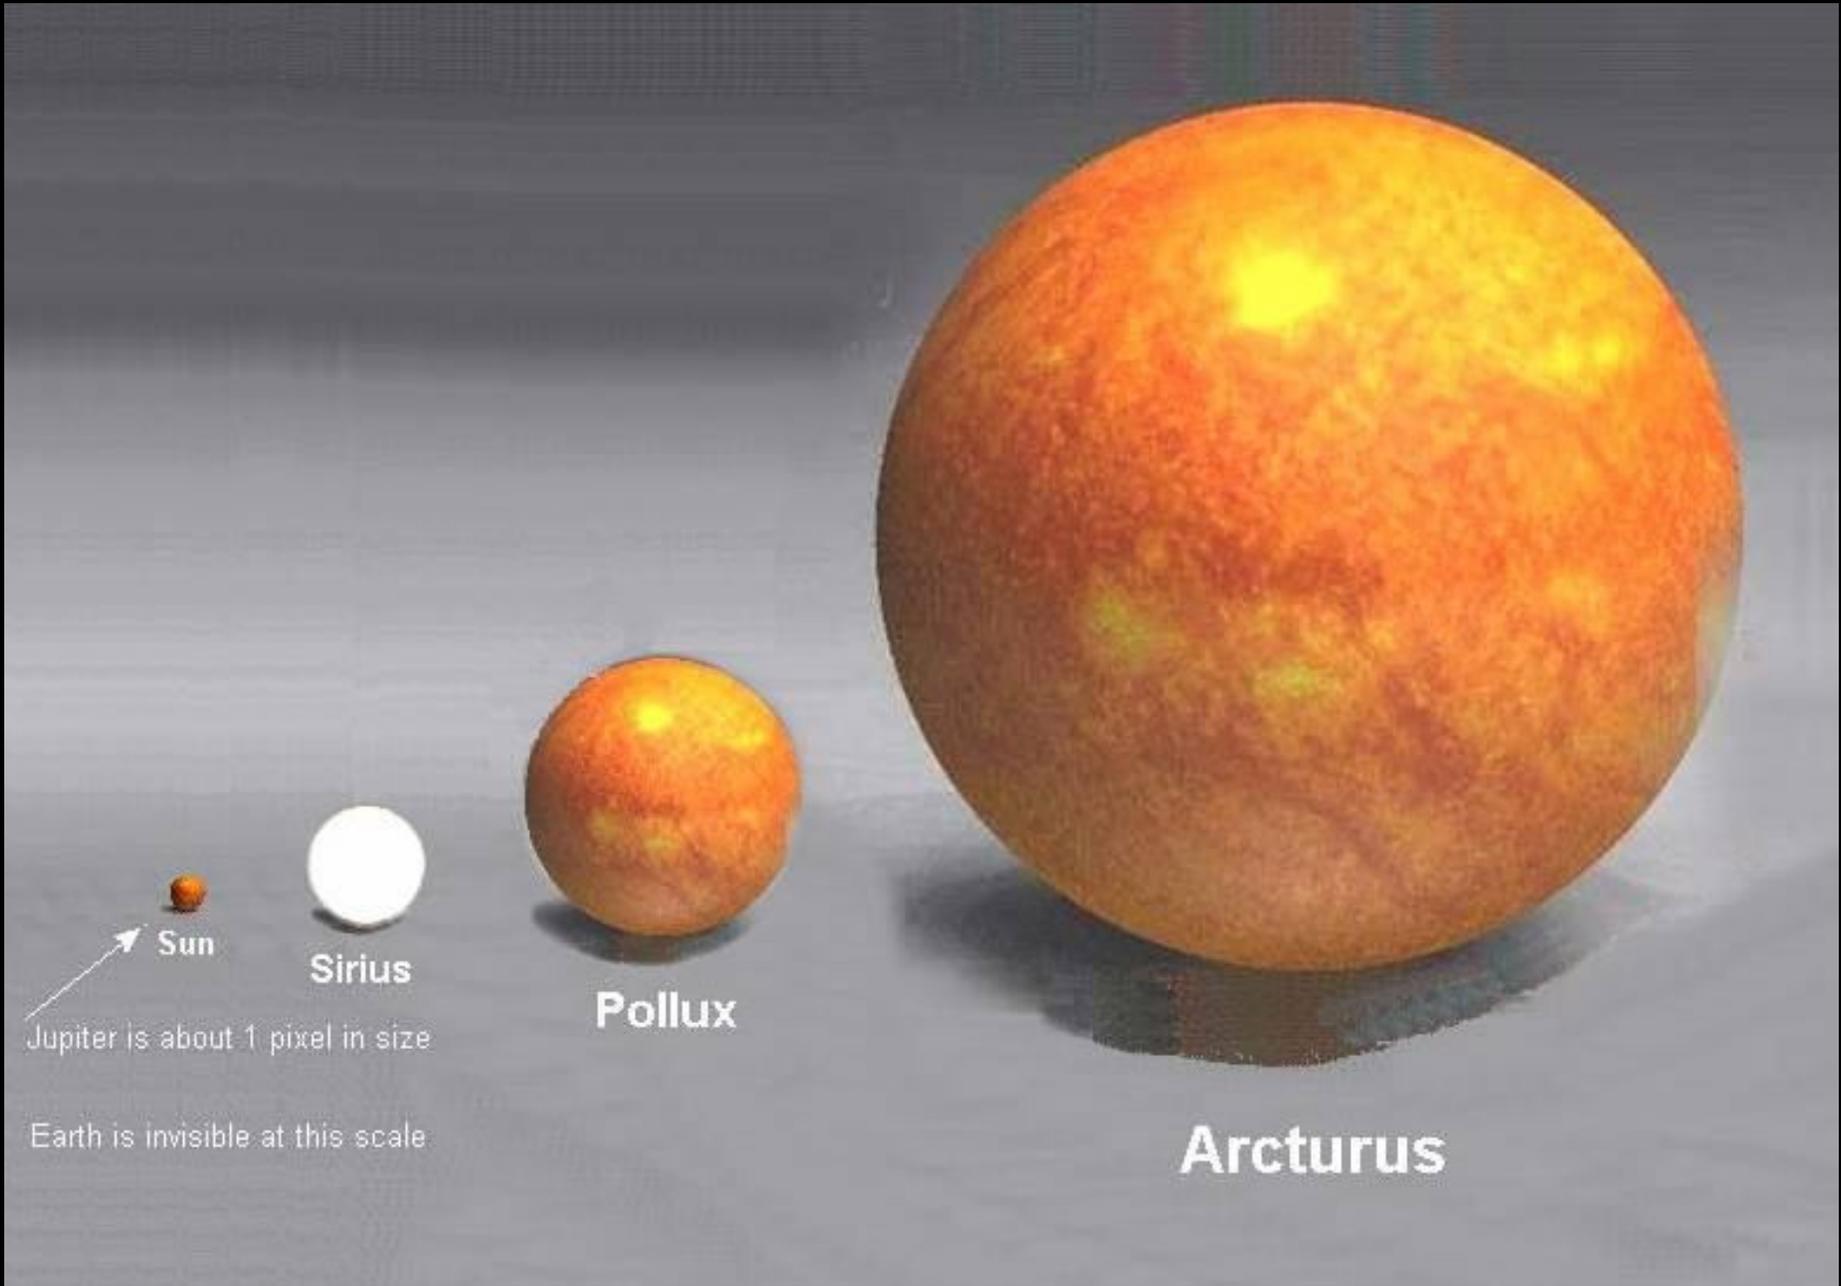

Jupiter

Earth

Pluto

I certainly thought this was enlightening. Beyond our sun... It's a big universe.

Betelgeuse

Antares

Jupiter is invisible at this scale  
Sun (1 pixel)  
Sirius Pollux Arcturus

Rigel

Aldebaran

Antares is the 15th brightest star in the sky. It is more than 1000 light years away.

Now how big are you?  
And, how big are the things that will upset you today?  
Or, for that matter, the things that are important?  
**KEEP LIFE IN PERSPECTIVE!**

Pass it around to all the people you know.  
It might help someone get a better feel for the important things in his/her life.
